ANTIQUES TRADE gazette

THE ART MARKET WEEKLY

Article 10 numbers now essential

New rules are now in force regarding the sale of those natural history specimens that require Article 10 certificates.

Under a recently enacted law – the Control of Trade in Endangered Species Regulations 2018 – it is essential to include the reference number of certificates alongside any catalogue description, listing or advertisement.

Crucially for both auctioneers and dealers, it is insufficient to say that a licence has been secured or applied for.

Annex A species

Article 10 certificates are required when selling 'unworked' or post-1947 specimens of the most endangered flora and fauna – those on Annex A on the register provided by the European Council or Appendix I on the list provided by CITES.

Unworked narwhal tusks, sawfish rostrums, whale teeth

Meiji on the menu

For over a century, a huge Meiji cloisonné vase provided the focal point to one of the San Francisco Bay Area's oldest restaurants. Now revealed as the missing element to a spectacular garniture made for the 1893 *Columbian Exposition*, it will be offered for sale at Clars Auction Gallery of Oakland, California, next month.
